PROFESSIONAL SUMMARY

Full Stack and Backend Developer with hands-on experience building production-grade web applications, AI-powered automation systems, and enterprise platforms. Proficient in Laravel, React, Next.js, Python, and FastAPI. Experienced in integrating the Anthropic Claude API for intelligent document workflows, agentic programs, and AI-driven tooling. Track record of delivering end-to-end solutions both independently as a freelance developer and as part of collaborative agile teams.

WORK EXPERIENCE

Junior Software Engineer & AI Engineer January 2026 – Present

Arellano Global | Remote

- Designed and implemented automation workflows that replaced manual, repetitive tasks, reducing turnaround time and human error in day-to-day operations.
- Built agentic programs powered by Claude (Anthropic) to automate document processing, data extraction, and report generation across internal tools.
- Developed Claude-driven assistants and tool integrations using the Anthropic API and Claude Code, applying prompt engineering, tool use, and prompt caching for cost-efficient performance.
- Maintained and extended multiple client-facing platforms (IDS, Meridian, GrowthOS) including bug fixes, database queries, and UI improvements.
- Collaborated with senior developers on requirement gathering, code reviews, and version control (Git) to ship reliable, well-tested features.

Freelance Web Developer August 2023 – November 2025

Independent | Remote | National Capital Region, Philippines

- Delivered end-to-end web applications for various clients across front-end interface design, server-side back-end engineering, and full-stack architecture.
- Built and deployed custom websites and web apps using Laravel, React, MySQL, and Tailwind CSS across different industries.
- Managed full project lifecycle independently from client requirements and scoping through development, testing, and delivery.
- Maintained ongoing client relationships with iterative improvements, bug fixes, and feature extensions based on evolving needs.

HR Associate (OJT – 486 hours) September 2024 – March 2025

Philand Security Agency Inc. | Quezon City, Philippines

- Assisted in recruitment processes including screening resumes and scheduling interviews.
- Managed and organized employee records and HR documentation.
- Communicated with applicants and employees regarding HR-related concerns.

EDUCATION

Bachelor of Science in Information Technology June 2021 – July 2025

Quezon City University

KEY PROJECTS

IDS Platform — Arellano Global | *Next.js, NocoDB, Xero API, Make.com, Claude AI*

- Built and maintained the IDS internal operations platform integrating Xero for vendor invoice management and payment tracking.
- Implemented automated PDF attachment uploads to Xero invoices, replacing a manual email-based workflow.
- Developed Claude-powered automation pipelines using Make.com for document processing, email dispatch, and data syncing.

GrowthOS Platform — Arellano Global | *Next.js, Whop API, Anthropic API, NocoDB*

- Developed and maintained client and admin-facing platform covering onboarding flows and credit-based billing via Whop.
- Integrated the Anthropic API to power AI-driven tools with prompt engineering, tool use, and prompt caching.

TalentFlow — Applicant Tracking System | *Laravel, PHP, MySQL, Tailwind CSS*

- End-to-end recruitment platform covering job posting, applicant registration, automated resume scoring, interview scheduling, and offer/hire workflow.

Hope Integrated School — School Management System | *Python, FastAPI, NocoDB, Tailwind CSS, Alpine.js*

- Production-grade modular school ERP with RBAC governance, enrollment scheduling, QR-based attendance, GPA computation, and PDF report card generation.

EmpowerEd — OSY Empowerment Platform | *Laravel, PHP, MySQL, Tailwind CSS*

- Web platform connecting Out-of-School Youth with coordinators, instructors, and employers featuring course lifecycle, automated grading, and certificate issuance.

TECHNICAL SKILLS

Languages & Frameworks: PHP (Laravel), JavaScript (React, Next.js, Alpine.js), Python (FastAPI), HTML, CSS

Frontend: Tailwind CSS, Bootstrap

Databases: MySQL, SQLite, NocoDB, SQL

AI & Automation: Anthropic Claude API, Claude Code, Prompt Engineering, Tool Use, Prompt Caching, Make.com

Third-Party APIs: Xero API, Whop API, Gmail SMTP

Tools & DevOps: Git, Docker, Composer, npm, Postman, VS Code

Reporting & Data: Power BI, ReportLab, DomPDF, PDF Generation

Other: REST APIs, JWT Authentication, QR Code Integration, RBAC

SOFT SKILLS

Empathy and Active Listening | Problem-Solving | Strong Work Ethic | Attention to Detail | Adaptability
